### Professional Summary

Senior Mobile Developer with 8+ years of experience specializing in Flutter, Android (Java/Kotlin), backend APIs, and scalable architectures.

Experienced in leading mobile teams, delivering full-stack solutions, and optimizing app performance.

### Core Skills

- Flutter / Dart
- Android (Java / Kotlin)
- Riverpod, Provider, GetX

- REST API
- Firebase, Maps, Deep Linking
- Git, CI/CD, Bitbucket
- Node.js, MongoDB
- PHP, Yii2 Framework, Laravel

## Experience

### **Flutter Mobile Developer — Unidbox Hardware Pte Ltd (Remote) (May 2025 – Present)**

- Enhanced warehouse workflows, internal transfer search, barcode processing.
- Implemented consistent UOM framework across stock modules.
- Improved accuracy, reduced manual workload, and optimized real-time communication.

### **Mobile Team Lead (Flutter) — QuickQ Innovation (Aug 2024 – April 2025)**

- Led mobile team, handled sprint planning and project workflows.
- Delivered major Social E-commerce features.
- Implemented CI/CD and scalable Flutter architecture.
- Mentored junior developers and improved team productivity.

### **Mobile Team Lead (Flutter) — App.com.mm (Jan 2023 – May 2024)**

- Led end-to-end development of high-traffic consumer applications.
- Designed and maintained Riverpod-based architecture for performance and scalability.
- Integrated Maps, multilingual support, secure payments, and deep linking.
- Optimized app reliability using analytics, crash reporting, and runtime monitoring.
- Collaborated closely with UI/UX and product teams to deliver impactful updates.

### **Senior Mobile Developer (Flutter) — DK Mads Co., Ltd (Nov 2021 – Oct 2022)**

- Developed Athabyar, Chit May May, and Edu Click applications.
- Used GetX + MVC architecture for clean and maintainable code.
- Integrated analytics, ads, and Crashlytics; deployed apps to Play Store/App Store.

**Senior Android Developer (Kotlin) — Systematic Business Solution (Jun 2019 – Nov 2021)**

- Delivered Kotlin apps with order tracking, notifications, and invoice systems.
- Built AR features and GPS location modules.

**Senior Android Developer (Java) — Creative Web Studio (Jan 2017 – May 2019)**

- Built Java apps including Shop Myar, Lucky Draw, and ATOM Telenor.
- Built SIM registration, SMS/OTP, and telecom subscription systems.
- Integrated analytics, crash reporting, and deep linking.

**Web Developer (PHP) — IrraHub Co., Ltd (Nov 2015 – Nov 2016)**

- Built a complete ERP registration system using Yii2 Framework.
- Worked with government officials for compliance.
- Performed extensive QA and system verification.
